Commitment to achieving Net Zero

The Skills Centre is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2025	
The information below forms the first emissions reporting baseline year for The Skills Centre. The Skills Centre occupies in a mix of managed tenanted office spaces and site-based porta cabin training centers.	
Baseline year emissions: 2025	
EMISSIONS	TOTAL (CO ₂ e)
Scope 1	Zero as in managed offices
Scope 2	10878.59kg CO ₂ e
Scope 3	13630.73kg CO ₂ e
Total Emissions	24509.32 CO ₂ e

Current Emissions Reporting

Reporting Year: 2025	
EMISSIONS	TOTAL (CO ₂ e)
Scope 1	Zero as in managed offices
Scope 2	10878.59kg CO ₂ e
Scope 3	13630.73kg CO ₂ e
Total Emissions	24509.32 CO ₂ e

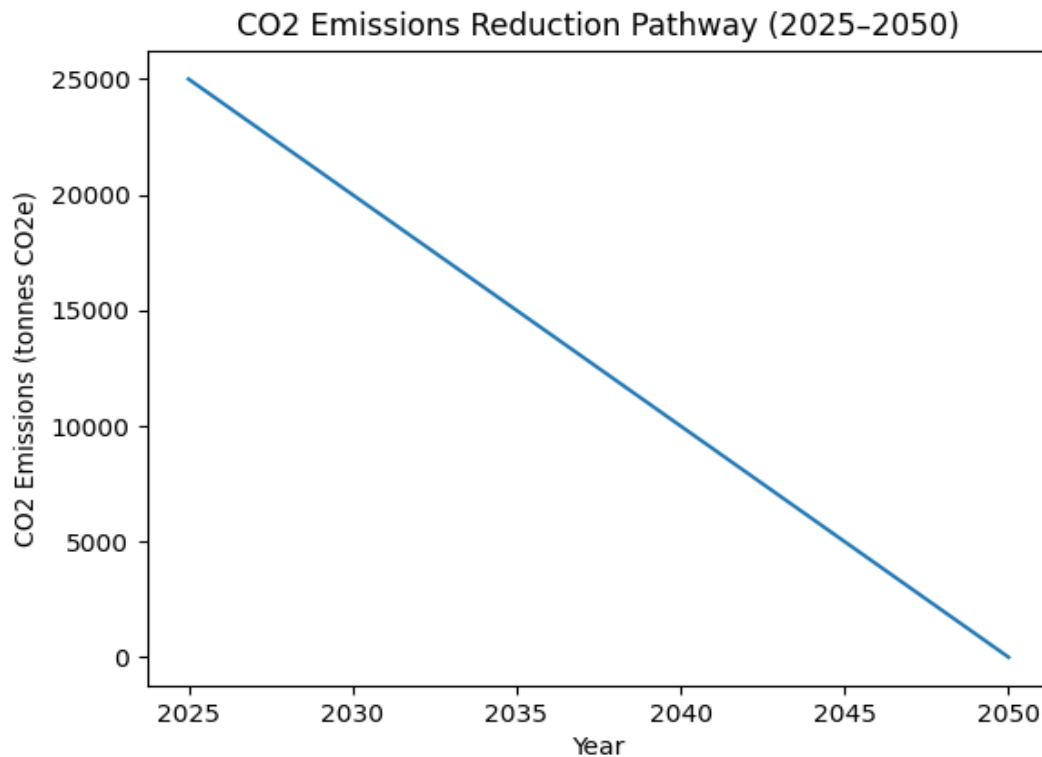

Emissions reduction targets

In order work towards our target to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 20,000kg CO₂e by 2030. This is a reduction of 20% over the period.

A new Carbon Reduction Plan will cover the following period 2030-35, with new reduction targets set in 2029.

Progress against these targets can be seen in the graph below, which demonstrates a straight-line approach to CO₂e reduction:

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2025 baseline. The carbon emission reduction achieved by these schemes equate to zero tCO₂e against the 2025 baseline and the measures will be in effect when undertaking the activities detailed.

Formal activity in this area began in 2024 with the formation of our Environment Group and this first report combined with senior level support for the overall plans and targets is a significant step forward for the organisation.

2025 is the baseline reporting year for The Skills Centre from which we will measure the impact of our environmental management measures and projects.

The proposed carbon reduction projects The Skills Centre have planned in 2025 and beyond include

- Improve waste management programme
- Reduce energy consumption programme
- Wide ranging staff engagement and information strategy
- Review of travel guidance
- Implementation of improved environmental criteria as part of internal procurement policy

A primary focus for 2026 is to develop more accurate measures for scope 3,

particularly working with our core suppliers to understand upstream and downstream carbon emissions.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the executive board of directors.

Signed on behalf of the Supplier:

Jean Stevens (Duprez)
